

TM1-TS

SINGLE CHANNEL TIMECLOCK 230V

PRODUCT OVERVIEW

Front View

Side View

The Ambiente TM1-TS four channel programmer has four on/off times with five/seven day operation. The programmer is designed to link with a UH3 wiring centre but can equally be used to replace standard programmers. Programmers are often difficult to understand but the touch screen feature makes this unit very simple to use.

Programming a Holiday

The time clock can be programmed to switch the zone off for a set number of days - ideal for when you are going away.

Selecting 5/2 Day or 7 Day Programming

Each zone can be programmed to work in 5/2 (Weekday/Weekend) or 7 Day mode.

Adjusting the Switching Times

Each zone has 4 On/Off times.

Mode Select

Each zone can operate in 3 modes.

Auto: The zone will work to the programmed switching times.

Off: The zone will switch off completely.

Constant: The zone will stay on indefinitely.

It is recommended that a 45mm back box is used with this unit to allow space for cables to all four channels.
